The World's Leading
Technical Service Partner

Our range of services

Perfect service at a reasonable price

Telelift offers a service package which covers all maintenance and repair costs including the material costs. This service package allows you to plan the annual operating costs of your system in detail.

- Inspections and repairs
- Inspection and assessment of your internal logistics
- Remedying faults including remote diagnosis
- Training staff
- Full and partial maintenance, maintenance-on-demand

Spare parts management

Complete service relating to spare parts

- Short notice deliveries
- For older systems, we make required spare parts available for the long term
- Component repairs
- Advice and documentation
- Professional installation

Modernization

Extends the life cycle of the conveying transport system

When does modernization make sense?

- When availability can only be guaranteed through repeated maintenance works
- It is getting harder to get hold of replacement parts
- Maintenance costs are increasing
- For new performance requirements
- The system should continue to be operated for at least 5 years to ensure that the modernization pays off
