

Optimizing internal transport processes in libraries through automated logistics solutions

Telelift GmbH is a leading international manufacturer of rail-based conveyor systems for transporting light goods.

Our products are put to successful use in libraries, hospitals and banks all over the world, as well as in the automotive and manufacturing industries and the commercial and administrative sectors.

We develop and produce modular logistics systems for in-house material transport that meet practically all customer requirements.

Telelift is certified in accordance with DIN EN ISO 9001:2008.

The World's Leading Library Logistics Partner

UniSortCar

Transportation and sorting with one system

BENEFITS

- Saving of labor by direct delivery of the media to the open-access or magazine areas
- Gentle and protected transport of media
- Flexible adaptation to existing buildings

APPLICATIONS

- Fully automated media return
- Transport and distribution to many floors
- Precise sorting into containers and book trolleys

UniCar

Individual containers for various transport tasks

BENEFITS

- Transport of several media at the same time
- Faster media availability thanks to transport on demand
- Secure transport thanks to anti-theft protection device

APPLICATION

- Manual and automated loading and unloading
- Transport of pre-sorted media in the open access and magazine areas

MultiCar

High transport capacity in Euro containers

BENEFITS

- Improved media availability through high transport capacity
- Gentle horizontal and vertical transportation of media
- Flexible and space-saving routing

APPLICATIONS

- Transport of pre-ordered media
- Transportation over long distances and multiple floors
- Connection to return and sorting systems
