

Optimizing internal transport processes in hospitals through automated logistics solutions

Telelift GmbH is a leading international manufacturer of rail-based conveyor systems for transporting light goods.

Our products are put to successful use in libraries, hospitals and banks all over the world, as well as in the automotive and manufacturing industries and also the commercial and administrative sectors.

We develop and produce modular logistics systems for in-house material transport that meet practically all customer requirements.

Telelift is certified in accordance with DIN EN ISO 9001:2008.
