

National Library

Teheran, Iran

Telelift UniCar system gives maximum performance for National Library of Iran

The Customer, the Requirements, the Solution

The new National Library of Iran is built on an area of approximately 62.000 m² in northern Tehran. With a capacity of 7 million books and with significant collections of cultural and historical scripts, the library is the largest one in Middle East.

In year 2002 and 2006 Telelift was asked to plan a modern media transportation system in two phases. Telelift installed a UniCar system which today performs over 1.000 transports per day.

Library

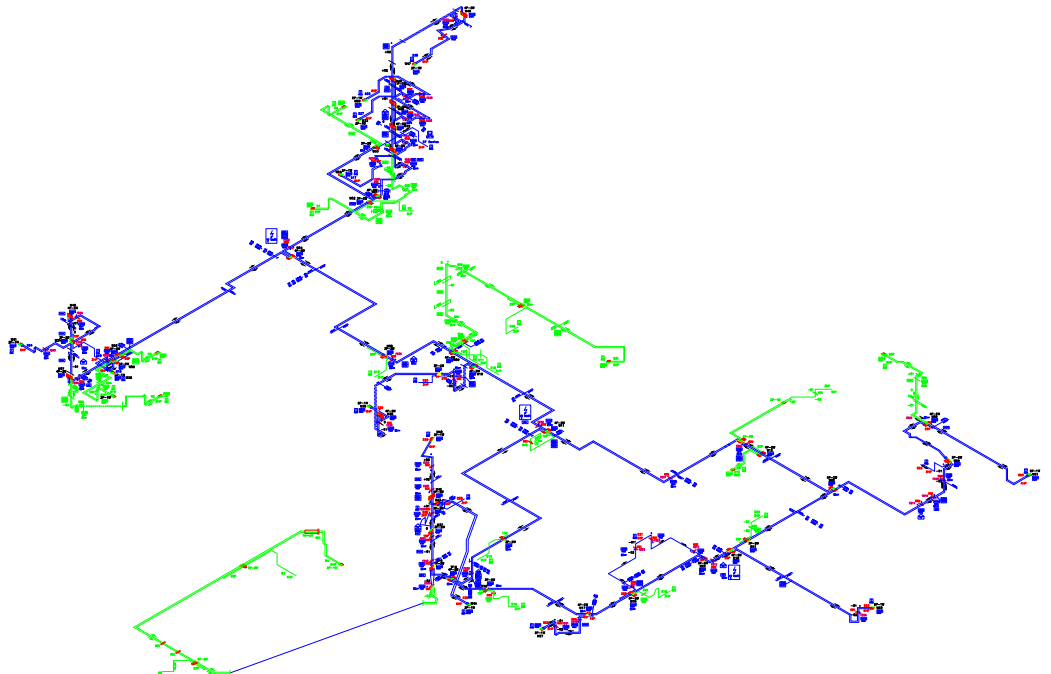

The Solution:

Track length:	2.400 m
Floors:	6
No. of stations:	42
No. of container:	90
