

University Library

**Regensburg,
Germany**

Telelift UniCar system gives maximum performance to University Library of Regensburg

The Customer, the Requirements, the Solution

Regensburg University Library is a central institution in Eastern Bavaria and the largest scientific library in the region. The library's stock consists of approx. 3.7 million books, microfilms and media.

While the University is continuously growing, the library's main task is the provision of literature and information for the scientists and for the students at the University. So Telelift planned and installed a UniCar system.

Library

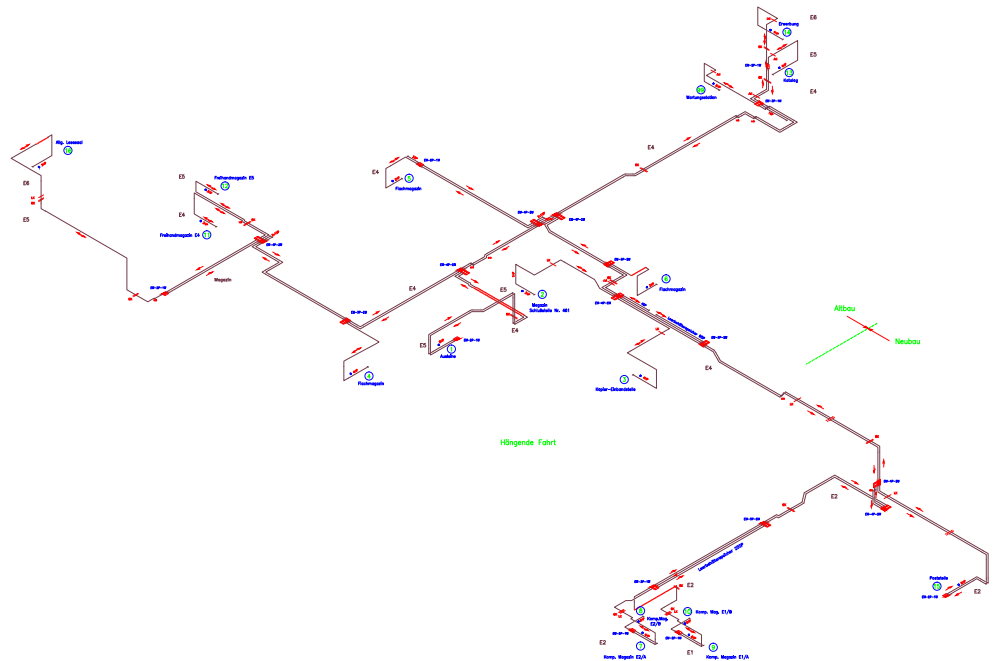

The solution:

| | |
|-------------------|---------|
| Track length: | 950 m |
| Floors: | 3 |
| No. of stations: | 17 |
