

Air Cargo Center

**Guangzhou,
China**

Automated and safe transportation of freight documents in the Guangzhou Air Cargo Hub with Telelift UniCar system

The Customer, the Requirements, the Solution

International Guangzhou Baiyun Airport is not only the largest and most modern airport of China. By 2015, the airport will have a capacity of 80 million passengers per year. Since 2010 the airport had a cargo capacity of 2.5 million tons. Until year 2015 the airport will grow up to 2.7 million tons of cargo freights per year.

The airport has the largest cargo terminal in China with a total area of 10,000 square meters. The airport is one of the fastest growing in the world. In typical peak hours 90 to 100 flights per hour are handled with a volume of 9,300 passengers.

Security

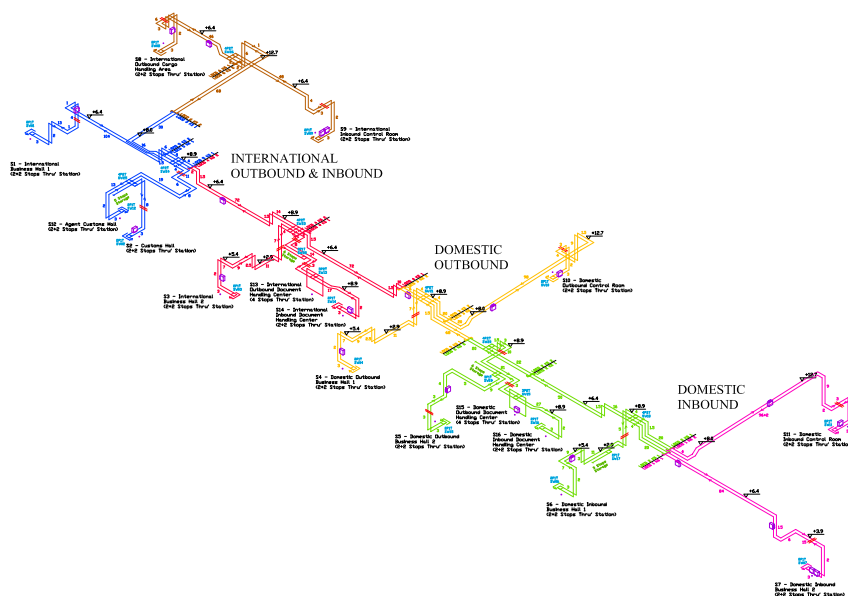

The Solution:

Track length: 3400 m
Floors: 2
No. of vehicles: 40
No. of stations: 16
Control: EMK-III
Commissioning: 2004

Benefits:

Transportation with Telelift UniCar offers protection against unauthorized access and manipulation. The transport is a fully monitored and documented process. More safety due to minimal staff in security areas gives higher protection for security-related transports.
